

CLAIMS

- Sub C1
1. A rapidly disintegrable solid preparation which comprises (i) a pharmacologically active ingredient, (ii) a sugar and (iii) a low-substituted hydroxypropylcellulose having 5 % by weight or more to less than 7 % by weight of hydroxypropoxyl group.
 2. A preparation of Claim 1, which is an orally rapidly disintegrable solid preparation.
 3. A preparation of Claim 1 or 2, which is a tablet.
 4. A preparation of Claim 1, wherein the sugar is a sugar alcohol.
 5. A preparation of Claim 4, wherein the sugar alcohol is mannitol or erythritol.
 6. A preparation of Claim 1, wherein the sugar is in an amount of 5 to 97 parts by weight per 100 parts by weight of the solid preparation.
 7. A preparation of Claim 1, wherein the low-substituted hydroxypropylcellulose having 5 % by weight or more to less than 7 % by weight of hydroxypropoxyl group is used in an amount of 3 to 50 parts by weight per 100 parts by weight of the solid preparation.
 8. A preparation of Claim 1, wherein the pharmacologically active ingredient is lansoprazole.
 9. A preparation of Claim 1, wherein the pharmacologically active ingredient is voglibose.
 10. A preparation of Claim 1, wherein the pharmacologically active ingredient is manidipine hydrochloride.
 11. A preparation of Claim 1, wherein the pharmacologically active ingredient is pioglitazone hydrochloride.
 12. A preparation of Claim 1, wherein the pharmacologically active ingredient is candesartan cilexetil.
 13. A preparation of Claim 3 which comprises fine granules.
 14. A preparation of Claim 13, wherein the pharmacologically active
- Sub D2

ingredient is comprised in fine granules of the solid preparation.

15. A preparation of Claim 14, wherein (i) a sugar and (ii) a low-substituted hydroxypropylcellulose having 5 % by weight or more to less than 7 % by weight of hydroxypropoxyl group are comprised in the solid preparation separately from fine granules.

16. A preparation of Claim 15, wherein the sugar is in an amount of 5 to 97 parts by weight per 100 parts by weight of the rest of the solid preparation other than the fine granules.

17. A preparation of the Claim 15, wherein the low-substituted hydroxypropylcellulose having 5 % by weight or more to less than 7 % by weight of hydroxypropoxyl group is in an amount of 3 to 50 parts by weight per 100 parts by weight of the rest of the solid preparation other than the fine granules.

A method of using
18. ~~Use of~~ a low-substituted hydroxypropylcellulose having 5 % by weight or more to less than 7 % by weight of hydroxypropoxyl group for producing a rapidly disintegrable solid preparation comprising a pharmacologically active ingredient and a sugar.

19. A method for improving fast disintegrability of a solid preparation comprising a pharmacologically active ingredient and a sugar which is characterized in that a low-substituted hydroxypropylcellulose having 5 % by weight or more to less than 7 % by weight of hydroxypropoxyl group is contained therein.
